

CURRICULUM VITAE

I am a highly motivated professional with nearly a decade of experience in the hospitality industry, where I have excelled in managerial roles across multiple departments. Throughout my career, I have developed strong problem-solving abilities, leadership skills, and a commitment to delivering excellence—qualities I am eager to bring to the tech industry, a field that has always inspired me with its innovation and transformative potential.

My passion for development led me to recently complete a full stack coding traineeship, where I successfully delivered two real-world projects to specification, utilizing a variety of programming languages and technologies. I am now excited to transition into a career in software development, where I can combine my dedication, technical skills, and experience to make a meaningful impact. As a hardworking and loyal team player, I am confident in my ability to contribute as a valuable member of your development team.

CODING TRAINEESHIP

IT Career Switch Ltd
Coding Traineeship – Full stack developer
1-year program

During the traineeship I had to demonstrate a very competent level of the following programming languages and technical skills

- HTML5, CSS3, JavaScript
- PHP, SQL, React, jQuery
- Python, Node.js, Bootstrap
- Command line Git, Github
- Remote API access

DEVELOPMENT EXPERIENCE:

Below are the two briefs of development projects I completed with IT Career Switch which can be found in my bio: <https://www.demiangodfrey.co.uk/>

Portfolio Project #1: “Gazetteer”

The specification was to reply to a website specification for a map-based app to provide information on countries, with a focus on a “mobile-first” development. Preferably using a framework, to then develop HTML, CSS and JavaScript with JQuery modules that use PHP server-based components to source data from third-party APIs (Geonames, OpenWeather). The solution is assessed on its delivery to specification, functionality, and usability.

Portfolio Project #2: “Company Directory”

A more rigorous reply to this specification was required as a user requirements document was needed to be prepared which, when signed off, triggers the release of SQL allowing to develop a “mobile-first” application to maintain a company personnel database (MySQL). Sign off is only achieved upon the student supplying an independently witnessed document providing confirmation of the system’s ability to perform error-free.

CAREER HISTORY:

May 2024 – Present

POSITION HELD:

Mortimer House
